

*Brecciated Mookaite
by Nature's Finest Art*

This new stone is a rare beauty from Australia and is found in very limited quantities. This stone is all opalite...when you held up to the light you may see through the Brecciated veins. These Brecciated veins are much like mosaic-like pieces of a puzzle.

Colors of this stone are often found as rich gold, brown, cream, white, and tiny veins of orange.

We often combine the colors of this stone with Smokey Topaz and Fresh Water Pearls.

Enjoy it while you can get it because it to is a one-mine wonder. There is very little of this stone available at this time.
